Time For Your Annual Skin Check!

Available at
**no cost
to you**

Skin cancer hides in plain sight; don't miss your chance for early detection. SkinIO brings skin screenings to you.

What

AI-powered skin screening: Benefit from our 10-minute total-body skin screenings by our Certified Skinographers.

Expert dermatologist review: SkinIO's expert dermatologists review every image and flag any spots of concern.

Results in days: Receive your results in just 2-3 days, with referrals to in-network dermatologists if needed.

How SkinIO Works

-  Check in at the desk. Once called, provide a brief medical history to your Skinographer.
-  Disrobe to your comfort level. The more skin you expose, the more skin that can be evaluated by our panel of dermatologists—especially those places you can't see where skin cancer likes to hide!
-  Your Certified Skinographer will take regional images of your skin and close-ups of any spots you're concerned about.
-  Your images are sent to our panel of dermatologists who analyze each image to determine if there are any areas of concern. Results are emailed to you in 2-3 days.
-  If the dermatologist recommends an in-person follow-up for further evaluation, our Connection to Care team will contact you. Our team can help connect you with a local, in-network dermatologist who will see you in 2-3 weeks.

The smartest way to screen for skin cancer.

Eligibility: Open to eligible participants, spouses, and dependent children over the age of 18, at no cost to you.

When

Saturday, October 25th
6:30 AM – 12:30 PM
