Be sure to drink plenty of water.

Free Skin Health Screenings!

Did you know that skin cancer is the most common type of cancer in America? Luckily, it is easy to treat when it's caught early. That's why in just a few minutes and at no cost to you, you can get your skin screened without going to the doctor! No appointment necessary. Just bring your insurance card and visit the SkinIO booth, located in the union hall.

Additional FREE Screenings for Eligible Members and Spouses!

- **Carotid Artery (Stroke) Screening** - Visualizes the build-up of fatty plaques within the carotid artery (along the neck) which causes the disruption of adequate blood flow to the brain, causing a stroke. The majority of all strokes are caused when these arteries become blocked. 98% of stroke victims have no symptoms prior to having a stroke.
- **Abdominal Aortic Aneurysm Screening** - Visualizes any abnormalities, enlargements or ballooning within the abdominal aorta. Aortic aneurysms are highly hereditary. When detected, they can be repaired, allowing individuals to live longer lives. Aortic aneurysms present no symptoms and are responsible for 25,000+ deaths each year.

- **Peripheral Arterial Disease (PAD) Screening** - An Ankle Brachial Index “(ABI) Screening” is used to screen for Peripheral Arterial Disease (PAD) in the legs which determines if blood flow blockages are present. *PAD is the leading cause for amputation in the U.S.*

Appointments for the additional screenings can only be made by calling Health Gauge at (877) 732-8258, or scheduling online at <https://teamsters731.hgscreenings.com>.

Note: Appointments for your blood tests and these additional screenings must be made separately.
